

How to power cycle (turn off/on) the new Ncomputing setup the HS/MS Computer Labs & Classrooms:

1. Unplug the power cord to the Main M300 Ncomputing module (annotated by the arrow).
2. Refer to the attached pictures to aide in identifying the main hub. It is the one with 3 network connections.
3. The satellite M300s do not have power and will reset when the main one is unplugged.
4. The L300s are diamond shaped and have their own power button to turn them on/off.

With the amount of power spikes and surges this quick fix will take care of resetting the stations.

If you need any further assistance or have any questions please contact us at techsupport@tasd.net
Thank you and have a wonderful day!

This is a M300 Main, the arrow shows you where the power button is

Satellite M300

L300 – On/Off switch is located on the right hand side of the picture below
