

Tunkhannock Area Primary Center

November Newsletter

Kindergarten

Kindergarten students (and teachers!) are enjoying having parent volunteers in their classrooms for Kid Writing.

Students have been busy learning about the Fall Harvest and are gearing up for Thanksgiving. Recently students measured, weighed, and compared many different types of pumpkins, along with learning about their life cycle.

Second Grade

Second graders are working on addition with regrouping of three digit numbers. Government is the current theme for reading.

Grade two was instrumental in helping out with a very big project organized by Mrs. Yanchick, one of our instructional coaches. The Evans Falls garden was recently moved to the Primary Center! Second graders planted bulbs, completed a nature scavenger hunt, learned about the parts of a flower, and wrote about their experience. What a great day!

First Grade

First graders are understanding digraphs and building their reading fluency every day! They are learning about voting, Veterans Day, Thanksgiving, characters, and in math, addition to 10. They continue to focus on caring, responsibility and respect.

A note from Mrs. Frisco: We are holding our very first Tiger Paw Assembly next week! Students have been working very hard to demonstrate caring, respect, and responsibility in and out of the classroom. Many have earned Tiger Paws already. Our students enjoyed a Halloween parade and party on 10/31, as well as a visit from Officer Seaberg's dog, Max, during Red Ribbon Week. Max can understand three different languages! A big "Thank you" to families who sent in donations for STEM projects!

Tiger Academy

The school counselors have been working with our students on our Tiger Pride Principles: developing respect, responsibility and caring. Lessons on what students are grateful for and how to express gratitude were introduced this week!

Ms. Lizza has visited each classroom to introduce the "Calm Classroom" component of the SEL curriculum. Also, November 13th was National Kindness Day! We listened to a morning announcement on the importance of always being kind to others.

STEM teachers have been coding with code.org and the Code and Go Mouse. Students will begin to learn about sequencing this week!
