

Primary Center Kindness Rock Garden

1st meeting-Roslund Elementary-4/4/2018 at 4:30

Background

We currently have a garden with some raised flower beds at Evans Falls Elementary.

These flower beds were installed to promote outdoor learning focused on garden maintenance and irrigation, problem-solving and critical thinking skills, responsibility and a connection with nature as well as many other fun activities!

This initiative was led by Mrs. Yanchick when she taught at Evans Falls Elementary.

Objective

With the closure of Evans Falls Elementary, we thought it would be a great idea to relocate the garden to the future primary center (currently Roslund Elementary) and introduce such a fun learning experience to all K-2 students.

Community Connections

To further expand the experience with the garden, we would like to incorporate kindness rocks.

A kindness rock is a rock illustrating words of encouragement.

In order to promote a culture of positivity and inclusion in the new primary center, we want to create a kindness rock garden.

Students will be creating the kindness rocks during the district-wide transition day.
